HINDENBURG HAS MANY CALLS FOR ASSISTANCE

One Asks Him to Find Lodging; Small City Wants Sewer.

Special Cable to THE NEW YORK HERALD. Copyright, 1922, by THE NEW YORK HERALD. BERLIN, April 8.—Popularity is a costly affair for Marshal von Hindenburg, who recently declared to a deputation that he spends many thousands of marks annually for postage on replies to letters received from all parts of Germany. He is forced to employ a pensioned officer to attend to his correspondence.

The Field Marshal said that often the oddest requests are addressed to him. One person asked him to help him find an apartment. A small German city applied to him for help in obtaining a sewer system which the city was too poor to install.

Set New Pace For Motor Car Industry

TO a public that has become keenly discriminating, low prices are appealing only when allied to high quality.

This fact explains the interest in Chandler prices. These prove that resources, manufacturing skill and high ideals can build the exclusive, powerful, long lived car at a figure little above those for admittedly cheap cars. This is the most significant automobile development of 1922.

The Chandler Six is the lowest priced car of its style, size and power. There are bigger automobiles of larger bore and stroke, but they cost more in original investment, and their greater weight involves larger maintenance outlay.

The extraordinary success of the Chandler line has not been lost on competing manufacturers. They have been forced to a belated acceptance of the policy of lowest possible prices, adopted by Chandler and other foremost makers at the beginning of 1922.

Whether in the snappy touring types or in the luxurious closed models the Chandler Motor Car Company is now building the closest priced car it ever produced. It will continue to build for quality.

NASH FOUR

Nash Leads the World in Motor Car Value

PERHAPS no other single feature of the Nash Four has inspired so much favorable comment as the remarkable riding comfort with which it is endowed.

The reason for the surpassing ease with which it travels the roughest roads goes straight back

to the new-type Nash springs, which are formed of one great masterleaf, an increased number of scientifically graduated thinner and more flexible leaves, and a rebound plate that, in effect, forms a cushion between the body of the car and the rushing recoil from a road blow.
